

Deep Diver Specialty

**Do you really need training to dive deep?
Our course answers this question**

The [Deep Diver Specialty Course](#) is designed to give divers a better understanding of deep diving and the factors associated with depth such as increased air consumption, **nitrogen narcosis**, **decompression illness**, first aid for depth-related injuries, and how to plan & organize a deep dive.

You will also get an overview of **recompression chambers** and discuss the **philosophy behind deep diving**, as well as the many risks divers unknowingly take by diving deep without the knowledge learned in this course.

Conducted over a two-day period, this course covers important aspects of deep diving and allows the student to **experience diving deep safely, under close supervision**. Our dives are scheduled to take place from a boat at awesome sites in Puget Sound!

Our course includes the following:

- **One Classroom Session**
- **3 - 4 Open Water Training Boat Dives***
- **All Boat Diving Fees****
- **Training Materials**
- **Tanks**
- **Deep Diver Specialty Certification**
- **Certification Card**

*Includes 3 dives providing student has previously performed a Deep Dive in his/her Advanced Open Water Course

**If boat option is selected

This specialty course also counts toward your [Master Scuba Diver Certification](#).
