

**Q:** What do you get when you cross a scooter with a diver in current?

**A:** **High-Speed Drift... of Course!!**

# High-Speed Drift

## Specialty Course

The Ultimate Underwater Adventure!

**Absolutely** one of the most exhilarating experiences you will ever have underwater, our **High-Speed Drift Course** focuses on using both the current and a dive propulsion vehicle (DPV / Scooter) to create an underwater thrill-ride!

**Exclusive only to TL Sea Diving,** Dive Center Owner / Master Instructor Trux Terkla dreamed this course up to offer another creative opportunity where Students could combine previously learned skills from both the Drift & DPV Diver courses to enhance their enjoyment of the underwater environment.

Covering more ground and slicing through the water at high speeds (while having incredible **fun**) are only a few of the by-products of this amazing specialty course!

**During this class, you will learn:**

- Safe ascents & descents with your buddy and DPV
- Techniques to stay together with your buddy
- Maneuvering techniques around underwater obstacles
- How to establish better control over your body in the current
- How to recognize and manage updrafts, downdrafts and back-eddy currents
- Several safety techniques needed when diving in current

While we cannot control the sea or its currents, we *can* control our bodies underwater. The amount of control you will have with a DPV in current is quite surprising; you will no longer be as vulnerable to the force of the currents!

Our course teaches you how to do this, making diving in currents fun & creating an **adrenaline-charged underwater adventure!**

High-Speed Drift diving is a **great experience and a lot of fun!** Some people like the thrill of covering a lot of ground at a fairly rapid clip, while others don't like the idea of having the water current control them. In either case, we train you *how* to **establish control underwater** using the current along with the DPV to **your** advantage.

**Our High-Speed Drift Diver Specialty Course includes:**

- **One Classroom Session**
- **One Full Day of Boat Diving**
- **Three Open Water High-Speed Drift dives**
- **High-Speed Drift Diver Specialty Certification**
- **Collectors-Edition T-Shirt**
- **Certification Card**

This course will also count as one more step toward your **[Master Scuba Diver Certification](#)**  
– the highest non-professional scuba diver rating!

The **High-Speed Drift Diver Specialty** is a **valuable course** for those qualified individuals who wish to experience flying safely underwater at high speeds, while learning to get the most out of their drift diving experiences!

For safety, we limit the number of participants in any buddy team to just two Student divers with one Instructor. Prior to enrolling in this course, the Student must possess certifications in **both** Drift Diver and DPV Diver Specialty Courses. Each Student will also be evaluated for comfort and competence in order to provide the highest level of safety and fun.
