

Underwater Videographer Specialty Course

We will teach you how to capture the **feeling** underwater!!

Our **Underwater Videographer Specialty Course** is designed to teach the student how to **capture moving images** from under the sea. Moving in a multitude of dimensions, our students will be able to learn the basics of shooting underwater video, including camera maintenance & care, hazards, shooting angles, composition, light considerations and white balance. In our “What Went Wrong?” segment, we will look at several video clips to determine how avoid common mistakes, thereby shortening the learning curve. Our Students will also learn shot sequencing & story line techniques in order to create a short film they can be proud to show their family & friends!

Learning how to **properly take video** underwater combines sound buoyancy skills with an artistic flair. The course enables each of our students to utilize their creativity & imagination to produce a film based on the amazing creatures and topography found beneath the surface.

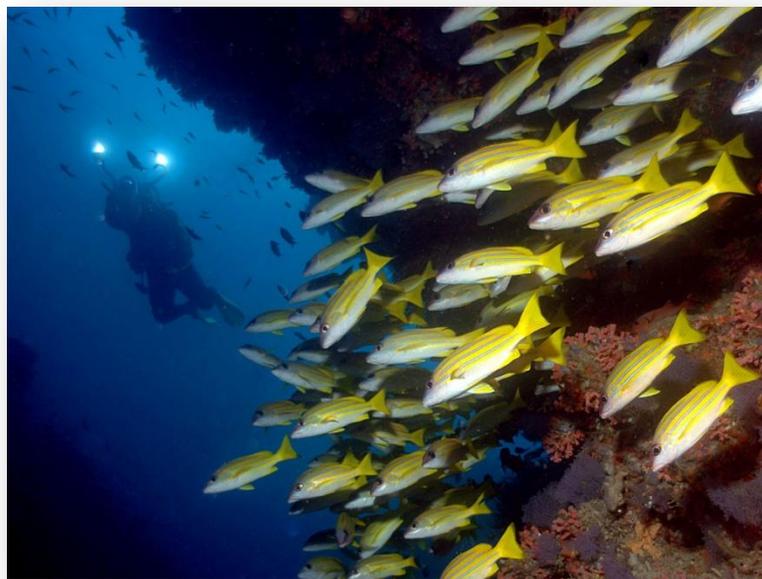

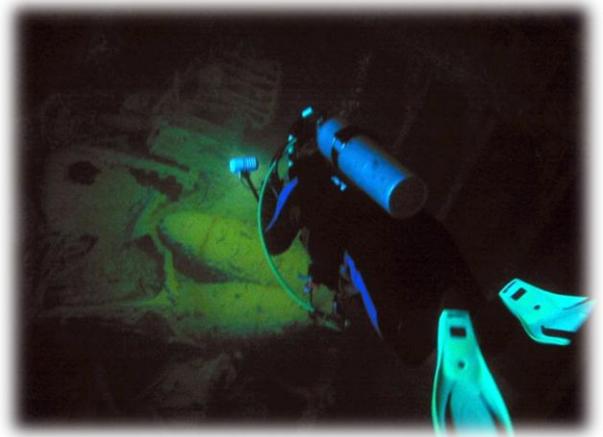

Given the fact there is so much to see and appreciate underwater, each film produces images that actually freeze time; they will never again be seen in exactly the same way.

Our course includes the following:

- One Classroom Session
- Three Open Water Dives
- Two Video Review Sessions
- Certification Card

Taught by PADI GO Pro Video Champion Trux Terkla, our [Underwater Videographer Course](#) will teach you camera tips, techniques and maintenance. We discuss the advantages of videography and how moving images enhance those provided by still photography. We educate you regarding proper resolution, basic **editing techniques**, white-balance adjustment and color loss underwater. During our dives, we'll also explore **macro shots** including proper focus & composition.

Our course will show you how to avoid flooding in order to **preserve your equipment**, while providing you an excellent opportunity to further hone your skills and confidence, as you bring the beauty from under the sea, to the surface. This course also counts as one more step toward your [Master Scuba Diver Certification](#).
